

# Patient Diagnosis Report

## Predicted Disease: Migraine

### Selected Symptoms:

- Receiving Blood Transfusion
- Unsteadiness
- Headache

### Symptoms Explanation:

#### Intense Headache:

Severe throbbing pain, usually on one side of the head.

#### Nausea:

Feeling sick or vomiting.

#### Light Sensitivity:

Discomfort or pain in bright light.

### Possible Causes:

- Hormonal changes
- Stress and lack of sleep
- Certain foods (caffeine, alcohol, chocolate)

### Medical Relief:

- Pain relievers (Ibuprofen, Naproxen)

- Migraine-specific drugs (Triptans)
- Avoiding triggers and maintaining a consistent sleep schedule

## Technical Information

Analysis performed using deep learning-based image classification model trained on medical imaging datasets. The model analyzes visual patterns and features to categorize the image into predefined classes.

## Recommendations

1. Review this report with your healthcare provider
2. Discuss any concerns or questions about the results
3. Follow your healthcare provider's recommendations for any additional testing or monitoring
4. Keep this report for your medical records

*This report is generated automatically and should be interpreted by qualified medical professionals. The analysis is based on machine learning algorithms and should be used as a supporting tool, not as a replacement for professional medical judgment. Regular medical check-ups and consultations are essential for proper healthcare management.*
