Medical Image Analysis Report

Report Generated: February 23, 2025 09:08:59
Case ID: benign (2)

Analysis Details

1. Image Information

Filename: benign (2).png

Analysis Date: February 23, 2025

Analysis Time: 09:08:59

2. Analysis Results

Classification: BENIGN

Confidence Score: 99.14%

A benign classification suggests the presence of a non-cancerous abnormality. While not immediately threatening, regular monitoring may be recommended.

3. Technical Information

Analysis performed using deep learning-based image classification model trained on medical imaging datasets. The model analyzes visual patterns and features to categorize the image into predefined classes.

4. Recommendations

1. Review this report with your healthcare provider
2. Discuss any concerns or questions about the results
3. Follow your healthcare provider's recommendations for any additional testing or monitoring
4. Keep this report for your medical records

This report is generated automatically and should be interpreted by qualified medical professionals. The analysis is based on machine learning algorithms and should be used as a supporting tool, not as a replacement for professional medical judgment. Regular medical check-ups and consultations are essential for proper healthcare management.
